

ORBIT Wins Contract for Earth Observation Ground Tracking Systems in the Eastern Europe Market

A leading earth observation customer chooses ORBIT to supply several earth observation ground stations

Netanya, Israel, May 2, 2013 – ORBIT Technologies Ltd. (TASE: ORBI), a provider of mission-critical connectivity solutions in a variety of markets, including satellite communications, earth observation, telemetry and communications management systems, today announced that it has been selected by a leading earth observation customer, to supply several ground systems for tracking of LEO (Low Earth Orbit) satellites in a deal summed up as \$US 2,500,000.

The project consists of deployment of several systems across the country in a way that ensures full coverage of LEO satellites orbiting over the land. Following the successful completion of previous project, ORBIT received this order from the same customer.

The ORBIT's solution is based on its 5 meters and above high-performance positioning systems with tilt correction. These products are ideal for meeting the high bandwidth requirements of customers who need to download data from LEO satellites with high resolution payloads. Tilt correction enables the system to overcome keyholes at the zenith.

"We are proud to be chosen once again by this strategic customer who shows trust in ORBIT to supply his earth observation ground station needs" stated Ofer Greenberger, CEO of ORBIT Technologies Ltd. "Our innovative and high quality products for the earth observation market are the results of the continuous effort of our team to become a global leader in this emerging market."

About ORBIT Technologies Ltd.

ORBIT is a global provider of highly engineered mission-critical communications systems and solutions for maritime, aerospace, and earth observation applications in commercial, defense and homeland security markets. Our portfolio includes mobile Satellite Communications systems, Tracking & Telemetry solutions and Communications Management Systems which are deployed on thousands of marine, airborne and ground platforms worldwide. ORBIT's customers include over 20
